Key Answers and Solutions from ICAS Paper A 2011

While the complete set of answers is extensive, the following sections highlight some representative questions, their solutions, and strategies employed.

Example 1: Pattern Recognition and Number Series

Question:

Identify the next number in the series: 2, 4, 8, 16, __?

Answer & Explanation:

The pattern doubles each time. Starting from 2:

- $2 \times 2 = 4$
- $4 \times 2 = 8$
- $8 \times 2 = 16$

Therefore, the next number is 32.

Strategy: Recognize the doubling pattern; multiply the previous term by 2.

Example 2: Basic Calculation and Data Interpretation

Question:

A jar contains 3 red, 5 blue, and 2 green marbles. If one marble is drawn at random, what is the probability it is not green?

Answer & Explanation:

Total marbles = $3 + 5 + 2 = 10$

Number of marbles not green = $10 - 2 = 8$

Probability = $8/10 = 4/5$ or 0.8

Strategy: Count total items, exclude the undesired category, and simplify the probability.
