What is SMAW?

Shielded Metal Arc Welding (SMAW) is a manual arc welding process that uses a consumable electrode coated in flux to lay the weld. An electric current forms an arc between the electrode and the workpiece, generating the heat necessary to melt the metal and create a strong weld joint. The flux coating on the electrode produces a shielding gas and slag that protect the weld pool from atmospheric contamination, ensuring a clean and durable weld.

Advantages of SMAW

SMAW offers numerous benefits, making it a popular choice for various applications:

- Portability: Requires minimal equipment, making it suitable for fieldwork.
- Versatility: Effective on a wide range of metals and thicknesses.
- Cost-Effective: Low initial investment and consumable costs.
